Legend

X601.14 (Engine management (MCM) electrical connector)

X602.14 (Engine management (MCM) electrical connector)

3: Engine wiring harness

Instructions

- Switch off ignition.
- Disconnect electrical connector 'X601 (Front cylinder head electrical connector)'.
- Disconnect electrical connector 'X602 (Rear cylinder head electrical connector)'.
- Check electrical lines and connectors for proper connection and locking, loose contact, damage, contamination and corrosion.
- Press button to continue

Note

- If damage is visible, rectify it appropriately or replace the component and abort the test.

Caution!

The test of all fuel injectors and their electrical lines is absolutely essential.
